

December 13, 2010

We recently completed build out of our new 3200 square foot office and had the pleasure of working with Jimmy and his crew from JT Low Voltage & Data Networking.

The phone and data installation went as planned and exceeded our expectations. The data racks look very professional and make maintenance easy. Our sound system with ceiling speakers is very impressive.

Most importantly, Jimmy's team was professional, courteous, and completed everything as promised. We highly recommend them!
